

ERGORACE

Item# 7988-889

The new, state-of-the-art ERGORACE upright stationary bike is the most advanced exercise bike ever built. The award winning design and high precision SIEMENS® electronics combined with advanced electromagnetic resistance system sets the standard for all other exercise bikes to be measured. The ultra-smooth performance and excellent ergonomics will impress even the most discerning athletes and cyclists. The optional World Tours 1.0 software makes this unit even more exciting as you can plan and ride routes with 3D GPS type mapping with automatic resistance changes that vary based on real life elevation changes of the terrain. The new ERGORACE is truly phenomenal.
